

AWS - Security Hub

- AWS Console -> Security & Compliance -> **Security Hub** (hint: in the same sections/group of IAM)
- AWS Security Hub gives you a comprehensive view of your high-priority security alerts and security posture across your AWS accounts.
- There are a range of powerful security tools at your disposal, from firewalls and endpoint protection to vulnerability and compliance scanners.
- More info here

<https://aws.amazon.com/security-hub/?aws-security-hub-blogs.sort-by=item.additionalFields.createdDate&aws-security-hub-blogs.sort-order=desc>

How it works

- AWS Security Hub is a paid subscription
- Security Hub runs automatic checks to scan for compliance with regulations and laws
- Amazon GuardDuty is an intrusion detection system (IDS), Amazon Inspector performs vulnerability analysis, Amazon Macie provides S3 bucket policy compliance scans
